**SILIKON 1000 INFORMATION SHEET**

***PATIENT NAME:*** \_\_\_\_\_ ***DATE:*** \_\_\_\_\_

- Silikon 1000 is approved by the FDA for treatment of retinal detachment of the eye, not FDA approved for cosmetic purposes. The use of Silikon 1000 for lip enhancement is off-label.
- Silikon 1000 is a sterile, clear, colorless silicone oil.
- Facial augmentation, including lips, with Silikon 1000 are permanent.
- Allergy testing for Silikon 1000 is not required. The substance is non-allergenic.
- The only contraindication to Silikon 1000 is known sensitivity to silicone oil.
- Several treatment sessions are required to yield better results.
- You may have swelling, tenderness at the site of injection and possibly bruising following the procedure
- Silikon 1000 is also used to produce collagen, therefore injection of the substance also stimulates collagen production in the area.
- Silikon 1000 will not prevent normal collagen loss with age. You may need small touch ups in the future.

I have read this information sheet regarding the use of Silikon 1000 for my cosmetic procedure and understand what I have read.
